

Over 20,000 units distributed worldwide

More than the micron

To every machine maker!  
Grinding, milling and turning

## Dressing technology to your needs and dressing application

Besides retrofitting on existing machines, we supply our dressing technology to original-equipment-manufactures, so called OEM. This is one of our strongest business divisions. The biggest challenge, in both ways, is to implementing the dressing unit in existing space. Due to this, it is absolutely an advantage to start projects by strong and deep communication with the customer, i.e. by exchanging CAD construction files, this allows optimizing space requirements with dressing application. You as customer, profits from already 18.000 realized projects, saving own time during the project-period, which means saving a lot of money. Our expertize is a quite interesting added value for you and your customer.

## Example of realized projects

CNC-Abrichter Typ 358

Studier S11

Ravensburger

Wohlenberg

KW Abrichttec GmbH
